1105-15-20 ACTUATOR (5/8" LINES W/ RELIEF) ASSEMBLY

PIK RITE recommends removing the existing flow control when adding the Actuator Kit and Prince Flow Control. This is the most efficient method. Leaving the existing flow control in line and wide open will cause a slight pressure drop in the system. If the existing Flow Control is left in line, take the one short hose included in the Kit from "M1" to the "IN" on the Actuator Flow Control. The other short hose will go from the Actuator Flow Control "Tee" in the Ex Port to the "M2" in the existing flow control.
